Dust your canvas periodically. You can wipe the surface of the canvas with a damp cloth and even gently rub any marked area if needed. Make sure the cloth is damp and free from any chemicals or detergents. Use water only and allow drying naturally.</p>

A large canvas weighs less than 3kg (5lb) so we recommend 2 angled picture hanging hooks. This will be sufficient for plasterboard or drywall and will ensure the canvas will stay level. Take care to position the hooks away from the bracing bars on the rear of the canvas to ensure a flush mount to the wall.</p>

Dust your artwork periodically. You can wipe the surface of the acrylic with a damp cloth and gently rub any marked area if needed. Make sure the cloth is damp and free from any chemicals or detergents. Use water only and dry with a soft clean cloth. Accidental scratches can be buffed out using Brasso or similar product. Use a soft damp cloth and a little Brasso. Apply gentle pressure with circular rubbing motion on the affected area. Care needs to be taken during this process to avoid over working an area. Wipe down and check regularly. Continue until scratch has gone the clean the whole surface to remove any residue using previous instructions.</p>

A basic J-shaped channel is fixed and secured level onto the wall. The U-channel used on the rear to brace the artwork simply sits on top by lifting and positioning the artwork onto this secured J-shaped channel. If you wish to hang your artwork on masonry, timber or metal – contact your local hardware store for advice on best screws and plugs to fix the supplied J-shaped wall mount. Glass Editions weigh approximately 10kg per square metre (20lb per 10sq ft). So the larger sizes do get quite heavy and require 2 persons to hang. (Large 1645 x 730mm = 12kg or 26lb)</p>
